

WEGO in Action is back!

WEGO in Action brings readers a summary of all the WEGO network is doing around the world with stories about our exciting diverse research, activist engagement and policy advocacy.

WEGO's activities are helping to map out where ecological, economic and social transformation are happening at the community level and on other scales, in the collective search for intersectional justice towards a more liveable world. WEGO aims to bridge the rift of a world marked by inequalities and plagued by the mantra of economic growth with possibilities of connectivity, vibrant materiality and livelihoods. From these engagements, WEGO contributes, builds and reaches out to feminist and other concerned scholars and activists working on the key issues of political ecology.

Happy reading!

Wendy Harcourt WEGO Coordinator
